o Goals taken from WFS, 96/01.
In the case of countries for which a SEA under 2,700 cal. is predicted for year 2010, the commitment should aim at rising in 20% (1% per year) between 1990-92 and 2010, in a higher proportion if needed to meet a minimum.
○ 1992 data taken as 1990; ☆ 1993 data taken as 1990.

■ Countries that must achieve a minimum of 2,300 cal.
♦ Countries that must grow 1% per year.
• Countries that starting off with less than 2,300 cal. can reach 2,700 cal.
☆ Countries that starting off with more than 2,300 cal. can reach 2,700 cal.
☆ Countries that starting off with more than 2,700 cal. can reach 3,000 cal.
* Countries that starting off with more than 2,950 cal. can reach 3,200 cal.
