(\*) Goals taken from the World Food Summit, 1996.

A: Countries that must achieve a minimum of 2,300 cal.

B: Countries that must grow 1% per year.

C: Countries that starting off with less than 2,300 cal. can reach 2,700 cal.

D: Countries that starting off with more than 2,300 cal. can reach 2,700 cal.

E: Countries that starting off with more than 2,700 cal. can reach 3,000 cal.

F: Countries that starting off with more than 2,950 cal. can reach 3,200 cal.

In the case of countries for which Dietary Energy Supply (DES) under 2,700 cal. is predicted for year 2010, the commitment should aim at rising by 20% (1% per year) between 1990-92 and 2010, or in a higher proportion if needed to meet the minimum.
